# DEAR COLLEAGUES,

On behalf of the Society for Ambulatory Anesthesia (SAMBA), I invite you to become a sponsor for our SAMBA 2025 Annual Meeting to promote your products and services. This in-person meeting is scheduled to be held May 15-17, 2025, at the Arizona Biltmore in Phoenix, Arizona. Hundreds of attendees are expected to participate in engaging, thought-provoking, educational sessions and lively discussions aimed at advancing the practice of ambulatory surgery and anesthesia. Anesthesiologists and CRNAs, many of whom hold leadership and administrative roles in ambulatory anesthesia, will be present. These healthcare providers are stakeholders and key decision-makers about products and services utilized in their ambulatory surgery centers, both in academia and private practice.

Your presence at SAMBA 2025 provides the perfect opportunity for you to market your products and services to these decision-makers and stakeholders in ambulatory anesthesia. Our exhibit hall includes space to showcase your products and services—products and services that, we believe, will help our members improve patient care, cut costs, and remain at the forefront of ambulatory anesthesia innovation. In fact, we have an entire evening reception dedicated to allowing our attendees to visit/interact with our sponsors and view their products. Your presence at the SAMBA 2025 Annual Meeting positions your brand as an industry leader and provides access to these stakeholders.

You can increase your exposure by selecting one of our add-on options or sponsorship packages. With our luncheon sponsorship opportunities, you have added time to educate attendees in more detail about your brand/product and achieve maximum engage-

ment. We would be happy to discuss these premier sponsorship opportunities in more detail with you. Don't miss this opportunity to showcase your brand to key stakeholders, network with peers and professionals and promote your products and services at a global level.

We are delighted to be meeting in-person and anticipate having a group of enthusiastic attendees looking forward to new ideas and products to improve their practice! I hope that you will partner with us for this exciting opportunity! Please contact us for additional details about our sponsorship opportunities.

Dear Andrew,

**Did You Know...**that patients taking SGLT2 inhibitors need to hold these medications for 3-4 days before elective surgery?

Sodium-glucose cotransporter-2 (SGLT2) inhibitors (so-called "flozins") are a relatively new class of hypoglycemic agent primarily used in the treatment of diabetes mellitus (DM). By inhibiting glucose and sodium re-absorption in the proximal tubule and causing glycosuria, their mechanism of action is independent of pancreatic insulin production.<sup>1</sup> These medications reduce the risks of myocardial infarction, heart failure, kidney disease, and mortality in diabetic patients.<sup>2</sup> They also seem to have cardiovascular and renal protective effects in non-diabetic patients.<sup>3</sup> Because of their established efficacy, you should expect to see "flozins" on the medication lists of an increasing number of your ambulatory surgical patients!
